DETAILED ACTION

Claim Rejections – 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 are rejected under 35 U.S.C. § 102(b) as being anticipated by U.S. patent 4,630,849 to Fukui et al.. The coupling of Fukui et al. teaches and illustrates the present invention with a pipe segment (20,21) of definite length for oil extraction industry, having a central portion with a substantially cylindrical wall and at least a threaded end portion (22,28) wherein the surface of the threaded end portion has a surface roughness 2.0 and 6.0 um (see column 9, lines 1-5) and the surface is covered by a first uniform layer of a dry corrosion inhibiting coating (see column 3, lines 45-50) and the first layer is covered by a second uniform layer of dry lubricant coating (also found in column 3, lines 45-50). As to claim 10 see column 3, lines 35-45 where it is noted that in an alternative embodiment the dry

lubricant coating containing solid particles may be dispersed within the dry corrosion inhibiting coating. As to claims 6-9 see figures 3-4. As to claims 15 and 16 see column 10, lines 1-5 and column 7, lines 1-10.
